

Get more  
for your solar

# Who we are

Energy Locals is a social enterprise that's making energy cheaper, cleaner and fairer.

What does that mean? Well for a start we promise that prices will never change for profit.

We also offer a huge solar feed in tariff to help customers get a better payback on their solar investments, and we purchase carbon offsets for every customer at no extra charge, making our energy carbon neutral.

Our prices are simple and fair and we pride ourselves on transparency. We also believe that good things can be done with energy spend, so half our profit goes to Aussie communities, charities and into new, local renewable energy.

- We are a 100% Australian owned & operated business.
- We pride ourselves on transparency and delivering a great customer experience.
- We don't own coal and gas power stations, and have no incentive to support them - we would rather you use as much possible solar possible from your own roof.
- We still need the grid - no one wants warm beer and prawns at Christmas, but it shouldn't cost thousands of dollars per year to have this certainty - the grid is already there after all.
- We provide a simple online process to change from your current retailer - now you're with a local Australian company, not a big multinational.
- We provide a no commitment bill analysis to make sure that the real savings we offer compared to your last supplier are clear and consistent.

# Why we're different

We love solar – and offer a great feed in tariff.

That's why we've partnered with solar installers all over the country.

- Clear and competitive pricing for grid top up
- No contracts - if you really find a better deal elsewhere we won't force you to stay.

# How to join

The sign up process is simple, you don't even need to wait until your system is installed to start saving.

Remember there are no contracts, exit fees or funny business – we just don't work that way.

Sign up online in under 3 minutes [www.energylocals.com.au/solus](http://www.energylocals.com.au/solus), or call our Melbourne based team and mention Solus Energy Solutions for the best rates on 1300 693 637 to get a fairer deal today.

# Questions

## Why are you doing this?

Because we think solar is the cheapest way to supply energy to homes, and we want more of it. We don't own coal or gas power stations.

## What happens if I want to leave?

We think our offer is fair and great value.

To prove we're serious we have no contracts, no exits fees. If you find a truly better deal we won't get in your way.

When can we get started?

Simply go to [www.energylocals.com.au/solus](http://www.energylocals.com.au/solus) to compare and save
